All Key Plastics Customers

Dear Valued Customer,

RE: Price Increase Effective 1st April 2021

We wish to advise that our PVC raw material and international transport costs continue to increase. In addition to this, many products we source and distribute in Australia have been increased by our suppliers. Unfortunately, the cost increases mentioned are of the scale we cannot absorb.

To ensure we continue to provide the great products you expect from Key Plastics, we will be implementing a price increase for orders delivered on or after the 1st April 2021. This increase will also apply to quotations for product delivered from 1st April 2021 onwards.

The increase will be applied across the following products groups:

- All Iplex PVC-U pressure pipe and fittings, Rhino® PVC-M pipe and Apollo® PVC-O pipe will increase up to 8%
- Iplex PVC-U DWV & Stormwater pipe and fittings will increase up to 8%
- All Conduit PVC-U Pipe & Fittings will increase up to 8%
- PP Traps will increase up to 10%
- Gatic products up to 10%
- Marker Tapes up to 10%
- Recycled Plastic Valve Covers and Surrounds up to 3%
- Stainless Steel & Galvanised Gasket Sets up to 15%
- PE Compression Fittings up to 3%
- PVC Reflux Valves up to 8%
- BlackMAX® and SewerMAX® pipe and fittings, up to 6%

We trust that this notice will enable you to prepare and or advise your customers in a timely manner. You can contact your Key Plastics Account Manager if you have any questions surrounding the increase.

We do appreciate your understanding and thank you for your valued business and ongoing support.

Yours sincerely

Shaun O'Brien
Head of Sales
