Price Increase Advice – April 20th 2026

Dear Customer,

Due to emerging global supply chain conditions affecting the availability and cost of feedstocks and other inputs essential for PVC resin production; together with substantially increased fuel and freight related charges, it has become necessary for us to implement a price increase effective **Monday 20th April**.

This increase of **28.5%** affects all products.

Please rest assured that throughout this period we will continue to closely monitor the evolving situation and take all reasonable operational measures to manage supply continuity to the best of our ability. It must be noted however that this volatility is likely to persist in the short term due to changing circumstances.

Our focus throughout this period will remain on working closely with our valued customers.

Please be advised of the following with regard to this price increase:

*This increase affects all current Quotations and price files. Any product not delivered by Friday 17th April will be supplied at new pricing; regardless of when a purchase order is received by APP. *(Product able to be supplied prior to this date will be subject to confirmation in view of prevailing product availability and our capacity to complete delivery)*

*We are unable to hold product for any customer ahead of this increase; and supply may be limited for certain products depending on capacity constraints.

*Average Historical Purchase data by customer may be referenced by APP with regard to supply capability throughout this period of volatility.

We thank you in advance for your continued support which is greatly appreciated.

Your Sincerely

David Hills
General Manager – Sales & Branch Operations
