Temporary Freight Levy Notification

Dear Brent,

As you may be aware, Australia has been experiencing sustained increases in fuel and supply chain costs over recent weeks.

We have made every effort to minimise and absorb these impacts where possible. However, the continued escalation has reached a level where an adjustment is necessary to ensure we can maintain the high standard of service you expect from us.

Effective Monday, 6 April 2026, a temporary 15% levy will be applied to all freight charges.

This measure will help us manage the additional costs while continuing to deliver reliable and consistent service. Please note that this levy is temporary. We will continue to monitor market conditions closely and will review the levy with the intention of removing it once cost pressures ease.

We fully recognise that any additional cost is not ideal, and we sincerely appreciate your understanding and continued partnership as we navigate these challenging conditions.

Thank you for your support.
